

1RU 48 Port UTP Angled 'V' Style Patch Panel - Unloaded

Product Images

Description

1RU High Density 48 Port UTP Angled 'V' Style Patch Panel - Unloaded (support bar included)

4Cabling 's 48 Port Angled Patch Panels are designed to easily route cables into a vertical cable manager, eliminating the need for horizontal, front cable management bars. The empty or unloaded patch panels are available to snap in Cat5e, Cat6, and Cat 6A keystone jacks or couplers. This unique networking solution provides a higher density connectivity fill solution into server racks and cabinets, and the angling of the patch panels allows the cables to flow into the vertical cable management. Label and inlaid marks make for easy identification and enable faster installation.

For unshielded cable solutions.

Fits all industry-standard 19-inch racks and cabinets

FEATURES

- **BETTER CABLE MANAGEMENT.** Angle reduces the bend radius of cables, allowing them to be routed horizontally for better organisation
- **EASY ACCESS.** Open-angle allows immediate rear access to connections from the front of the patch bay
- Patch leads route directly into vertical managers saving rack space by eliminating horizontal cable management
- Mounts on 19" equipment racks

- Compatible with Cat5e, Cat6 & Cat6A Keystone Jacks
- Internal cable manager maintains proper bend radius
- V-type snap-in panel: angled for easy handling of cables
- Label and inlaid marks are available for the identification for cabling management

SPECIFICATIONS

- Height: 1RU, 48-port
- Panel Body Material: SPCC 1.5mm
- Support Bar Material: SPCC 1.5mm
- Size: 19 inch
- Set of 4 x cage nuts included

WARRANTY

1-year limited warranty.
