

OE Elsafe Starter Socket Female Black

Product Images

Description

Starter sockets are the connecting devices most commonly used to connect the modular soft wiring to the fixed wiring of the building. OE Elsafe's Starter Socket - Female - is compact enough for use in most ducted wall skirtings, inside partitions or screens and similar positions where space is limited and a surface mounted wall starter is not practical.

Features

- Starter sockets are rated at 20A.

- Compact enough for use in most ducted wall skirtings.
- Colour: Black.

Warranty

1 year limited warranty.
