Description

4Cabling 1RU 24 Port CAT6 Universal Termination Rack Mount Patch Panel

Patch Panels are the backbone of a structured cabling solution and we understand the importance of installing quality products. Unique to 4Cabling, these Keystone Jack patch panels provide a fast and simple way to terminate CAT6 Solid UTP Cable. With the built-in cable management and write-on labels, organising your cabinet will no longer be a hassle.

The main advantage of using the Keystone Jack Patch Panels is that the outlets are easily replaceable so if an outlet gets damaged there is no need to replace the entire patch panel - simply replace the individual jack.

FEATURES

- 24 x CAT6 Keystone jacks
- T-568A or B Wiring
- Can be terminated using both a KATT & 110 Tool
- Patented dust covers to protect unused ports from dust and damage
