# 4C | Mark & Move Wall Plate Stencil | Electrical outlet cutting Jig

We are proud to introduce the 4Cabling Mark & Move Wall Plate Stencil.

The unique, patent pending design was created in-house, in consultation with our trade customers, and provides what you need to ensure your electrical outlets are positioned correctly for a professional-looking finish.

Electrical outlets are typically installed in an ad-hoc manner, with little thought given to the precise positioning of the electrical outlets in relation to each other. This can result in electrical outlets being installed at different heights throughout the premises or inconsistently spaced when two or more outlets are placed next to each other.

Featuring 3-tools-in-one, the Mark & Move comes in a sturdy box to protect it between uses, and its patent-pending\* design includes:

- Two detachable wall plate STENCILS so you can correctly position single or multiple outlets, positioned vertically or horizontally
- Multiple LEVELS to ensure everything is straight, for both horizontal and vertical alignments
- A clear RULER to allow for precise measurements that you can replicate easily

Super easy to use, the 4Cabling Mark & Move Wall Plate Stencil facilitates the marking of 2 cut-outs reducing the overall marking time.

When you have more than 2 outlets simply line up the first jig with the last marking you made so that you are all set to easily mark the next outlet using the second jig and ensuring perfect alignment.

The 4Cabling Mark & Move will quickly become the go-to tool for anyone demanding the precision required for a quality finish.

## FEATURES

- Easy to mark wall plate cutting holes
- Save time when marking multiple outlets
- Mark all outlet points at equal distance and height
- Works for both horizontal and vertical installations
- Comes with a handy trade-box to protect it in your toolkit
- Unique patent pending design (\*Patent application number: 2021901602)

## WARRANTY

1-year limited warranty
