Description

Lockable 2 Door FOBOT Wall Enclosure | Up to 48 Fibres (48 x LC or 24 x SC/ST)

The Lockable 2 Door Fibre Wall Enclosure is a secure and reliable solution for organizing and protecting your fiber optic connections. With its sturdy construction and lockable doors, it ensures the safety of your valuable equipment. This enclosure can accommodate up to 48 fibres, allowing for flexible connectivity options. The rodent-proof design and top and bottom cable

entry points provide added convenience and protection. Included accessories such as cable guides, cable glands, cable ties, and wall screws and plugs make installation a breeze. The black powder-coated steel material adds a sleek and professional touch to your setup.
