TP-Link TL-SG3210 | JetStream 8-Port Gigabit L2+ Managed Switch with 2 SFP Slots

Introducing the JetStream 8-Port Gigabit L2+ Managed Switch with 2 SFP Slots, a high-performance networking solution designed for businesses. With 8× gigabit RJ45 ports and 2× gigabit SFP Slots, this switch ensures lightning-fast connections for all your data transfer needs. Experience seamless performance whether you're handling large files, streaming HD media, or running resource-intensive applications.

The JetStream switch is seamlessly integrated into Omada SDN, offering centralized cloud management and convenient access through the Omada app. Enjoy the benefits of Zero-Touch Provisioning (ZTP) for effortless deployment and easy monitoring and control of your network from anywhere. With static routing, your internal traffic is efficiently managed, optimizing network resources and reducing bottlenecks.

Security is a top priority with the JetStream switch. Benefit from robust features such as IP-MAC-Port Binding, ACL, Port Security, DoS Defend, and more, safeguarding your network against unauthorized access and potential threats. Additionally, the switch's advanced QoS capabilities and IGMP snooping optimize voice and video applications, ensuring seamless performance for latency-sensitive traffic.

In summary, the JetStream 8-Port Gigabit L2+ Managed Switch with 2 SFP Slots offers high-speed connections, advanced management features, and robust security. With its seamless integration into Omada SDN, centralized cloud management, and efficient resource utilization, this switch is the perfect networking solution for businesses seeking reliable and powerful performance. Upgrade your network infrastructure today and experience the full potential of your business.

FEATURES

- **Full Gigabit Ports:** 8× gigabit RJ45 ports and 2× gigabit SFP Slots provide high-speed connections
- **Integrated into Omada SDN:** Zero-Touch Provisioning (ZTP)^{*}, Centralized Cloud Management, and Intelligent Monitoring
- **Centralized Management:** Cloud access and Omada app for ultra convenience and easy management
- **Static Routing:** Helps route internal traffic for more efficient use of network resources
- **Robust Security Strategies:** IP-MAC-Port Binding, ACL, Port Security, DoS Defend, Storm control, DHCP Snooping, 802.1X, Radius Authentication, and more
- **Optimize Voice and Video Applications:** L2/L3/L4 QoS and IGMP snooping
- **Standalone Management:** Web, CLI (Console Port, Telnet, SSH), SNMP, RMON, and Dual Image bring powerful management capabilities

^{*}Zero-Touch Provisioning requires the use of Omada Cloud-Based Controller.
