TP-Link TL-SL1218MP | 16-Port 10/100 Mbps + 2-Port Gigabit Rackmount Switch with 16-Port PoE+

Product Images

TP-Link TL-SL1218MP | 16-Port 10/100 Mbps + 2-Port Gigabit Rackmount Switch with 16-Port PoE+

Introducing the TL-SL1218MP, a feature-rich networking solution designed to meet your connectivity and power management needs. With 16 PoE+ 10/100 Mbps RJ45 ports, 2 Gigabit RJ45 ports, and 2 combo Gigabit SFP slots, this switch offers versatile connectivity options for your devices.

One of its standout features is the high PoE power budget, providing up to 30 W of power for each PoE port and a total of 250 W for all PoE ports combined. This eliminates the need for additional power adapters, making it perfect for powering PoE-enabled devices like IP cameras and access points.

The TL-SL1218MP's extend mode allows for data and power transmission over distances of up to 250 meters, making it an ideal choice for surveillance systems. Additionally, the priority mode ensures optimal performance for sensitive applications, guaranteeing the quality of video monitoring and other critical tasks.

With the innovative Isolation Mode, you can achieve one-click client traffic separation, enhancing security and network performance. Plus, this switch requires no configuration or installation, making it incredibly user-friendly.

Upgrade your network infrastructure with the TL-SL1218MP and enjoy seamless connectivity, efficient power management, and enhanced security for your business.

FEATURES

- 16× PoE+ 10/100 Mbps RJ45 ports, 2× Gigabit RJ45 ports, and 2× combo Gigabit SFP slots
- High PoE power budget with up to 30 W for each PoE port and 250 W for all PoE ports*
- Up to 250 m data and power transmission under extend mode specially designed for surveillance system**
- Priority mode for ports 1–8 to guarantees the quality of sensitive applications like video monitor
- Isolation Mode allows one-click client traffic separation for higher security and performance
- Easy to use, with no configuration and installation needed

*PoE budget calculations are based on laboratory testing. Actual PoE power budget is not guaranteed and will vary as a result of client limitations and environmental factors.

**The speed of the ports which are under extend mode will be downgraded to 10 Mbps. Actual transmission distance may vary from the quality of the cables.
