TP-Link TL-SL1218P | 16 Port 10/100Mbps + 2 Port Gigabit Rackmount Switch with 16 Port PoE+

Product Images

TP-Link TL-SL1218P | 16 Port 10/100Mbps + 2 Port Gigabit Rackmount Switch with 16 Port PoE+

Upgrade your business network with the TL-SL1218P, a versatile 16-Port 10/100 Mbps + 2-Port Gigabit Rackmount Switch with 16-Port PoE+. With 16 PoE+ 10/100 Mbps RJ45 ports, 2 Gigabit RJ45 ports, and 1 combo Gigabit SFP slot, this switch offers flexible connectivity options for your devices and applications.

Experience the power of high PoE budget with up to 30 W of power per PoE port and a total budget of 150 W for all PoE ports combined. Say goodbye to additional power adapters and simplify your setup, making it perfect for businesses seeking efficiency.

Designed for surveillance systems, the TL-SL1218P supports data and power transmission up to 250 meters in extend mode. This feature ensures seamless connectivity across larger distances, providing reliable networking for your security cameras and other devices.

With priority mode for ports 1-8, the TL-SL1218P guarantees superior quality for sensitive applications like video monitoring. You can trust this switch to deliver uninterrupted performance and prioritize critical tasks.

Upgrade your network infrastructure with the TL-SL1218P, and enjoy the power of its high PoE budget, extended data transmission, and priority mode. Simplify your setup and enhance connectivity for your business with this reliable switch.

FEATURES

- 16× PoE+ 10/100 Mbps RJ45 ports, 2× Gigabit RJ45 ports, and 1× combo Gigabit SFP slot
- High PoE power budget with up to 30 W for each PoE port and 150 W for all PoE ports*
- Up to 250 m data and power transmission under extend mode specially designed for surveillance system**
- Priority mode for ports 1–8 to guarantees the quality of sensitive applications like video monitor
- Isolation Mode allows one-click client traffic separation for higher security and performance
- Easy to use, with no configuration and installation needed

*PoE budget calculations are based on laboratory testing. Actual PoE power budget is not guaranteed and will vary as a result of client limitations and environmental factors.

**The speed of the ports which are under extend mode will be downgraded to 10 Mbps. Actual transmission distance may vary from the quality of the cables.
