TP-Link TL-SF1008LP | 8 Port 10/100 Mbps Desktop Switch with 4 Port PoE

Introducing our 8-port PoE Ethernet Switch, a versatile and powerful networking solution. This switch boasts 8 × 10/100 Mbps RJ45 ports for high-speed data transfer. What sets it apart is the 4 × PoE ports that transfer both data and power individually, eliminating the need for separate power sources for compatible devices. It fully complies with IEEE 802.3af standards, ensuring seamless integration with a wide range of Powered Devices (PDs).

The switch's Extend Mode enables data and power transmission over an impressive 250-meter range, making it perfect for large areas. Priority Mode gives high priority to ports 1-2, ensuring stability for sensitive applications like video conferencing. With support for up to 41 W of PoE power on all PoE ports, the switch can handle various PoE devices with ease. Additionally, the switch is plug-and-play, requiring no configuration, simplifying setup.

FEATURES

- 8 × 10/100 Mbps RJ45 ports
- 4 × PoE ports transfer data and power on individual cables
- Works with IEEE 802.3af compliant PDs
- Up to 250m data and power transmitting range under Extend Mode**
- Priority Mode ensures high priority of ports 1–2 to guarantee the quality of sensitive application
- Supports PoE Power up to 41 W for all PoE ports*
- Plug and play with no configuration required

*PoE budget calculations are based on laboratory testing. Actual PoE power budget is not guaranteed and will vary as a result of client limitations and environmental factors.

**The speed of the ports in extend mode will downgrade to 10 Mbps. The actual transmission distance may vary due to power consumption of PoE-powered devices or the cable quality and type.
