TP-Link | TL-WPA4220 KIT | 300Mbps Wireless AV500 Powerline Extender

The TL-WPA4220 KIT is a Wi-Fi Powerline Extender Starter Kit that enhances your home network by extending both wired and wireless connections. With the HomePlug AV standard, it allows high-speed data transmission of up to 600Mbps over your existing electrical wiring, ensuring lag-free HD or 3D video streaming and online gaming experiences.

One of the standout features of this kit is the One Touch Super Range Extension, enabled by the Wi-Fi Clone Button. This feature simplifies Wi-Fi configuration and helps create a seamless and unified home network. By pressing the Wi-Fi Clone Button, you can easily extend your wireless network to previously hard-to-reach areas of your home or office, providing a stronger and more reliable Wi-Fi connection wherever you need it.

In summary, the TL-WPA4220 KIT is a powerful and user-friendly solution for extending both wired and wireless connections. With its high-speed data transmission capabilities and One Touch Super Range Extension feature, it ensures a seamless and efficient home network, making it an ideal choice for improving connectivity in various areas of your living or work space.
