

## TP-LTP-Link | CPE605 | Outdoor 5GHz N150 CP

### Product Images

# TP-Link | CPE605 | Outdoor 5GHz N150 CPE

The CPE605 is an outdoor wireless communication product designed for long-distance applications, offering data rates of up to 150Mbps on the 5GHz band. Its key feature is a 23dBi high-gain directional antenna with a dedicated metal reflector, which enhances beam directivity, reduces latency, and cancels out noise, making it ideal for reliable long-range connections. The device boasts a sturdy structural design with innovative snap-lock parts for fast assembly and stability, even in strong winds.

With a durable IP65 weatherproof enclosure and built-in protection against 15 kV ESD and 6 kV lightning, the CPE605 is suitable for all weather conditions, ensuring continuous and reliable operation. It incorporates TP-Link Pharos MAXtream TDMA technology, which optimizes throughput, capacity, and latency performance for improved network efficiency.

Administrators will find the Pharos Control system advantageous, providing them with a centralized management solution at no extra cost. Additionally, the device supports Passive Power over Ethernet (PoE), enabling flexible deployment and convenient installation.

In summary, the CPE605 is a high-performance outdoor CPE with a 5GHz wireless data rate of up to 150Mbps. Its excellent beam directivity, sturdy design, and weatherproof features make it perfect for long-distance applications. With advanced technology and a free centralized management system, it ensures reliable and efficient connectivity, even in challenging outdoor environments. Its ease of assembly and support for PoE allow for convenient installation and deployment options.

## FEATURES

- Up to 150Mbps on 5GHz wireless data rates
- 23dBi high-gain directional antenna and a dedicated metal reflector, ideal for long-distance application
- Excellent beam directivity, improved latency and noise cancellation
- Innovative snap-lock parts make for fast assembly and a sturdy structural design keeps CPE605 stable even in strong winds
- Durable IP65 weatherproof enclosure along with 15 kV ESD and 6 kV lightning protection ensures all-weather suitability
- TP-Link Pharos MAXtream TDMA technology improves throughput, capacity and latency performance
- Pharos Control gives administrators a free, centralized management system
- Passive PoE supports to allow flexible deployment and convenient installation
