TP-Link | TL-MR6400 APAC | 300Mbps Wireless N 4G LTE Router

The TL-MR6400 APAC is a 300Mbps Wireless N 4G LTE Router designed to offer cutting-edge 4G network access, allowing users to share internet connectivity with up to 32 Wi-Fi devices. With download speeds of up to 300Mbps, it provides fast and efficient internet performance. Setting up the router is hassle-free as it requires no configurations; simply insert a SIM card, and it's ready to use. The compatibility of SIM cards in over 100 countries has been assured through extensive field tests, ensuring reliable performance worldwide.

The router comes equipped with two detachable advanced LTE antennas, providing stable and efficient connections to every device. These external antennas enhance signal reception, enabling smooth internet access across the entire network. For situations where a 4G connection is unavailable, the TL-MR6400 APAC supports Wi-Fi router mode, allowing users to connect an Ethernet cable to the LAN/WAN port for flexible access options.

Overall, the TL-MR6400 APAC is a versatile and reliable solution for high-speed 4G LTE internet connectivity, supporting multiple Wi-Fi devices and providing stable connections with its advanced LTE antennas. Its easy setup and Wi-Fi router mode offer flexibility, making it a convenient choice for users seeking seamless internet access in various environments.

FEATURES

- 300Mbps Wireless N 4G LTE Router
- Cutting-edge 4G network – share internet access with up to 32 Wi-Fi devices and enjoy download speeds of up to 300Mbps
- Plug a SIM card and play – no configurations needed, compatibility of SIM cards in 100+ countries are assured by years of field tests
- Two detachable advanced LTE antennas – enjoy stable and efficient connections to every device thanks to the two external antennas
- Wi-Fi router mode – plug an Ethernet cable into the LAN/WAN port for flexible access if you can't get a 4G connection

WARRANTY

[3-Years Manufacturer 's Warranty](#)
