TP-Link | Archer VR2100v | AC2800 Wireless MU-MIMO VDSL/ADSL Modem Router

The Archer VR2100v is a feature-rich AC2100 Wireless MU-MIMO VDSL/ADSL Telephony Modem Router designed to deliver super-fast internet speeds and exceptional coverage. It utilizes the latest Super VDSL (VDSL2 Profile 35b) technology, offering blazing internet speeds of up to 350 Mbps, surpassing the limits of previous generations. The router ensures ultra-fast wireless performance, reaching up to 1733 Mbps on the 5 GHz band and 300 Mbps on the 2.4 GHz band, enabling smooth and seamless online experiences.

One of its notable features is MU-MIMO technology, which allows simultaneous data transfers to multiple devices, reducing congestion and boosting overall throughput. This ensures that multiple users can enjoy high-speed internet simultaneously without compromising on performance. Moreover, the Archer VR2100v supports TP-Link OneMesh™, allowing it to work with other compatible OneMesh™ products, creating a flexible and cost-efficient Mesh network, providing whole-home coverage.

The router also caters to wired connections with its USB 3.0 port and four Gigabit ports, delivering lightning-fast wired connections up to 10 times faster than previous generations. This makes it ideal for streaming high-definition videos, gaming, and other bandwidth-intensive tasks. To further enhance user convenience, the Archer VR2100v can be easily managed via the TP-Link Tether app, enabling remote control and automatic updates for smooth and hassle-free network management. In conclusion, the Archer VR2100v is a versatile and high-performance router, delivering super-fast internet speeds and extensive coverage, making it an excellent choice for users seeking robust and reliable connectivity for their homes or small offices.

FEATURES

- Super VDSL: The Latest Super VDSL (VDSL2 Profile 35b) tech delivers internet speeds of up to 350 Mbps
- Ultra-Fast Speed: Surpasses the WiFi speed limits of the previous generation, reaching up to 1733 Mbps on 5 GHz and 300 Mbps on 2.4 GHz
- MU-MIMO Technology: Simultaneously transfers data to multiple devices to reduce congestion and boost the average throughput
- Whole-Home Coverage with OneMesh™: Works with TP-Link OneMesh products to create a flexible and cost-efficient Mesh network
- Lightning-Fast Wired Connection: USB 3.0 port and 4× Gigabit ports run up to 10x faster than the previous generation to unleash your home entertainment
- TP-Link Tether App: Easily access and manage your network via the Tether app, such as remote control and automatic updates

WARRANTY

[3-Years Manufacturer 's Warranty](#)
