TP-Link | Archer C54 | AC1200 Dual-Band Wi-Fi Router

The Archer C54 is an AC1200 Dual-Band Wi-Fi Router designed to provide faster AC Wi-Fi, making it ideal for tasks like 4K video streaming and high-speed downloading. With its 4× antennas and Beamforming technology, the router offers far-reaching Wi-Fi coverage and reliable connections, ensuring a seamless online experience for users throughout their home or office space. The router also offers versatile functionality with its Multi-Mode 3-in-1 support, allowing users to choose between Router, Access Point, and Range Extender modes, offering added flexibility to suit different networking needs.

This router comes equipped with convenient parental controls, enabling users to manage and control when and how connected devices can access the internet, making it an excellent choice for families. Additionally, the Archer C54 features a guest network function, providing separate access for guests to ensure the security of the host network. For those interested in smooth HD streaming and optimized IPTV streaming, the router supports IGMP Proxy/Snooping, Bridge, and Tag VLAN, ensuring a smooth and uninterrupted streaming experience. Furthermore, the Archer C54 is compatible with the latest Internet Protocol version 6 (IPv6), ensuring future-proof compatibility with evolving technologies. Its compact and mountable design allows users to save space and seamlessly integrate the router into any décor, making it a practical and aesthetically pleasing addition to any environment.

FEATURES

- Faster AC Wi-Fi: C1200 dual-band is ideal for 4K video streaming and high-speed downloading
- Far-Reaching Coverage: 4× antennas and Beamforming delivers extensive Wi-Fi coverage and reliable connections
