TP-Link | TL-WR841N | 300Mbps Wireless N Router

Product Images

TP-Link | TL-WR841N | 300Mbps Wireless N Router

The TL-WR841N is a high-performance 300Mbps Wireless N Router, specifically designed for interruption-sensitive applications like HD video streaming. With its fast wireless speed, users can enjoy seamless streaming without buffering or lag. The router also includes a Guest Network feature, providing a separate and secure access point for guests, ensuring the privacy and security of the home network.

The TL-WR841N is fully compatible with IPv6 (Internet Protocol version 6), ensuring future-proof connectivity with the latest networking technologies. For added convenience, the router features a WPS button, enabling easy wireless security encryption with just a push of the button, making it simple to protect the network from unauthorized access. Additionally, the router supports IPTV streaming optimization with features like IGMP Proxy/Snooping, Bridge, and Tag VLAN, ensuring smooth and uninterrupted streaming experiences.

Furthermore, the TL-WR841N offers Bandwidth Control, allowing users to prioritize and allocate more bandwidth to their preferred devices, ensuring a reliable and efficient network performance for essential tasks. To maintain control over internet access, the router provides Parental Controls, enabling users to manage and set restrictions on when and how connected devices can access the internet, making it an excellent choice for families looking to ensure a safe and controlled online environment. Overall, the TL-WR841N is a versatile and feature-rich wireless N router that caters to various networking needs while delivering fast and secure connectivity for both home and office environments.

FEATURES

- Performance: 300Mbps wireless speed ideal for interruption sensitive applications like HD video streaming
- Guest Network: provides separate access for guests while securing the home network
- IPv6: compatible with IPv6 (Internet Protocol version 6)
- WPS button: easy wireless security encryption at a push of WPS button
- IPTV: supports IGMP Proxy/Snooping, Bridge and Tag VLAN to optimize IPTV streaming
- Bandwidth Control: assigns your preferred devices with more bandwidth
- Parental Controls: manage when and how connected devices can access the internet
