TP-Link | TL-WR802N | 300Mbps Wireless N Nano Pocket Router

The TL-WR802N is a 300Mbps Wireless N Nano Router that offers fast wireless data rates, making it perfect for various tasks like video streaming, online gaming, and Internet calling. Its compact pocket-size design makes it an ideal choice for both home and travel use, providing convenient and reliable Wi-Fi connectivity on the go. This versatile router supports multiple operation modes, including Router, Repeater, Client, AP, and hotspot modes, ensuring flexibility to adapt to different networking scenarios and requirements.

One of the notable features of the TL-WR802N is its flexible power options. It can be powered through a micro USB port using an external power adapter or by connecting it to a computer via USB, providing power adaptability for various situations and locations. The router boasts easy installation, allowing users to set it up within minutes, making it an excellent choice for users seeking a hassle-free and quick solution for their Wi-Fi needs. With its compact size, fast wireless performance, and easy setup, the TL-WR802N offers a reliable and convenient networking solution for both home and travel use.
