# TP-Link | TL-WA1201 | AC1200 Dual-Band Wi-Fi Access Point

The TL-WA1201 is an AC1200 Wireless Access Point that offers high-speed dual-band Wi-Fi, with 867Mbps at 5GHz and 300Mbps at 2.4GHz, providing excellent connectivity for various tasks. Its flexible deployment options support Passive PoE, allowing the device to carry electrical power and data simultaneously through a single Ethernet cable, simplifying installation and reducing cable clutter.

This versatile access point supports multiple modes, including Access Point, Range Extender, Multi-SSID, and Client modes, offering flexibility to meet various network requirements. The MU-MIMO technology enables the device to transfer data simultaneously to multiple devices, resulting in 2× faster performance and improved overall network efficiency. Additionally, the TL-WA1201 features four fixed antennas with Beamforming technology, extending and concentrating Wi-Fi signals for boosted coverage and stable connections.

To enhance security and marketing capabilities, the access point includes a Captive Portal, providing a designed portal page for users to log in before accessing the network, ensuring heightened security and allowing businesses to customize the portal for marketing purposes. With its high-speed performance, flexible deployment options, and advanced features, the TL-WA1201 is an excellent choice for users seeking a reliable and efficient wireless access point for various networking needs.
