## Description

---

The premium quality 42RU 800mm Deep X 800mm Wide Rack Cabinet is a cost-effective server rack designed for maximum performance of your equipment, with multiple uses beyond IT.

### Designed for Maximum Performance

The true measure of a good server rack is performance of the equipment in it; especially considering that [OpenXtra](#) recommends a maximum 27°C server room temperature. High temperatures reduce equipment lifetime, quickly cause hardware failure and have a potential \$7,117 per minute downtime cost. **That's why our 42RU Rack's sleek design is based on utility:**

- a solid black colour that matches any office layout
- an easy-to-set-up design
- pre-punched cabling holes, ready for wiring
- vented front and sides for maximum cooling
- Split Mesh rear door
- 2 vertical cable managers at the front
- top mounted fan tray with 4 fans (you'll certainly need that in the summer in Perth, Melbourne, Sydney or Brisbane)

### Strong Enough to Protect Your Equipment

Our premium data cabinet guarantees the safety of your valuable equipment, through:

- solid steel frame with welded construction for added strength
- a key lockable, toughened-glass front door mounted on the heavy-duty framework
- vented front and sides facilitate temperature regulation
- revolving front and side locks

That should do the job adequately... unless you want to guard it with guns and swords too.

### Multiple Uses Beyond IT

Storing small servers is just a tip of the iceberg. The 42RU rack also accommodates:

- communications equipment like telephone systems and PABX equipment
- network equipment e.g. routers and switches
- audio video equipment like DVR
- security systems
- CCTV equipment
- IT equipment e.g. patch panels and steam servers
- industrial systems
- computer equipment
- UPS equipment
- other rack mountable equipment

This is why we serve clients from multiple industries, such as NEC Australia Pty Ltd; The University of Queensland; and Melbourne Airport.

### Problem-Free Integration

Built around universal 19" standards, each 42RU 800mm Deep X 800mm Wide Rack Cabinet is compatible with your existing system setup. It works flawlessly with all equipment from leading vendors and OEM brands.

### Grows With Your Business

As you business grows, remove the side panels for easy configuration to accommodate your expanding network equipment. This should serve you for a long time, until you're ready to upgrade to a higher capacity cabinet like the 42RU 800mm Deep X 800mm Wide Rack Cabinet.

### The Beginning of a Long-Term Relationship

We don't just take your money and run. Each 42RU 800mm Deep X 800mm Wide Rack Cabinet comes fully assembled with a **1-Year warranty**. And you can easily reach us if you have any queries before and after purchase.
