

18RU 550mm Deep Wall Mount Cabinet + Swing Frame

Product Images

Description

Our 18RU 550mm Deep Wall Mount Cabinet + Swing Frame is designed to seamlessly combine maximum security with versatility.

Functional Design = Minimal Maintenance

The last thing you want is to spend more time maintaining your equipment than actually using it. Also you definitely want to cut down monthly maintenance costs, which can be as high as \$1,000. **The 18RU Rack is designed to avoid exactly these problems:**

- the solid black cabinet has a transparent front door for convenient equipment monitoring
- pre-punched cabling holes make complex cable management simple
- vented front and sides facilitate temperature regulation
- 100mm hinged back section with cable entry hole
- provision for 2 optional fans provides greater cooling

This principle of functional design is a key feature you can expect of all our products, even if you prefer a higher range swing cabinet.

Secure Yet Easy to Configure

Despite the difficulty in combining maximum security with easy configuration, our 18RU 550mm Deep Wall Mount Cabinet achieves this seamlessly, through:

- revolving front and side locks
- a key lockable front door and side panels
- toughened-glass front door mounted on the heavy-duty framework
- removable side panels for easy configuration

Compatibility Benefits Everyone

You might have a problem finding a compatible charger for your Smartphone, but you'll never have any issue integrating your system setup with our server cabinet. Consequently that's a benefit for you (you don't have to buy new gadgets) and us (universal standards ensure wider use).

Each 18RU Rack + Swing Frame is built around [universal 19" standards](#).

It works flawlessly with existing setups and equipment from leading vendors as well as OEM brands; even if you purchased your equipment locally in Perth, Melbourne, Sydney, Brisbane or any other city.

A Cabinet That Does Yoga

Who wouldn't want that?

Apart from a reversible front door (can swing open left or right), the 100mm back section is hinged so you can easily access the rear of your equipment.

Household, Business and Industrial Applications

Its compact size makes the 18RU rack extensively useful in residential, business and industrial applications; as seen in the variety of clients we serve, including Suncorp Australia, National Australia Bank and NEC Australia Pty Ltd.

Use it for:

- communications equipment
- network equipment
- audio video equipment
- security systems
- CCTV equipment
- IT equipment e.g. a Minecraft servers
- industrial systems
- computer equipment
- other rack mountable equipment

If you need a bit more space, we have huge selection to choose from.

Before- and After-Sale Service
