

Green CAT5E Network Cable Patch Lead 5M

Product Images

Description

CAT5e Green Patch Leads and Network Cables

The Category 5 Enhanced (CAT5e) standard was developed from the earlier Cat5 standard to provide Gigabit capability across a copper cabling structure. It remains the most widely used type of network cable today.

To achieve faster speed on your network and maintain your data integrity, each cable is manufactured to the highest standards and specification. Each cable assembled using high quality stranded Cat5E cable and RJ45 modular plugs. Fitted with snagless molded strain relief boot connectors that makes connecting and disconnecting your cables easier, faster and safer.

Features

- Length Options: 30cm, 50cm, 1m, 2m, 3m, 5m, 10m
- 100% Brand new and Performance tested
- Colour **Green**
- Category: CAT5e
- Backwards compatible with CAT5
- Straight Through configuration
- Suitable for 10, 100 and 1000 Base-T networks
- Molded snagless boot connectors that reduce possibility of cable becoming accidentally unplugged as well as allow you to patch easier, faster and safer.
- Unshielded 24-gauge twisted pair (UTP)
- Core Type: Stranded core

- Compliant with EIA/TIA-568B standards
- High Speed Data transfer rate
- 8-pin RJ45 male connector to 8-pin RJ45 male connector

Applications

Our CAT5e green patch leads can be used to connect almost all networking components together. Variety of possible connections that can be made with these patch cables include the following:

- Patch Panel to Computer
- Computer to DSL or Cable Modem
- Computer to Hub or Switch
- DSL or Cable Modem to Router
- DSL or Cable Modem to Hub
- DSL or Cable Modem to Wireless Access Point
- Wall Plate to Computer
- Xbox to Router and Local Network
- PS3 to Router and Internet
- Servers to Patch Panel
- Schools and Libraries
- [Racks and Cabinets](#)
- And many more possible options...
