TP-Link | VIGI NVR1008H | 8 Channel Network Video Recorder

Elevate your surveillance system with the TP-Link VIGI NVR1008H 8 Channel Network Video Recorder, a high-performance solution that ensures continuous recording and easy access to your security footage. With 24/7 continuous recording, this NVR automatically stores up to 10 TB of data from connected cameras, providing you with quick and convenient access to your video history. The 8-channel real-time live view capability, supporting sharp image definition up to 5MP, guarantees that you capture every detail from every angle, enhancing your monitoring capabilities.

One of the standout features of the VIGI NVR1008H is its simultaneous playback function, which allows you to replay the feed from up to 4 cameras at the same time. You can increase the replay speed and easily find events in the video schedule, making it a breeze to review footage and identify important incidents. Remote monitoring has never been easier with the dedicated VIGI app, providing you with convenience and ease of access to your surveillance system from anywhere.

This NVR is equipped with H.265+ compression technology, ensuring that your cameras transmit compressed, crystal-clear video without consuming extra bandwidth. This not only saves disk space but also eases network loads and reduces overall monitoring costs, all while maintaining image quality. With ONVIF compatibility, you can effortlessly add IPCs from VIGI and other brands, creating a versatile and powerful surveillance network. Plus, the NVR1008H provides one HDD interface with support for up to 10 TB of storage, ensuring that your data is securely stored locally. With two-way audio support, you can engage in voice intercom conversations while monitoring your feed from anywhere, making it suitable for management and enhancing communication capabilities. The high video access bandwidth of 80 Mbps ensures that your NVR connects with more cameras at high resolutions, allowing for flexible and scalable surveillance. Upgrade your security system with the TP-Link VIGI NVR1008H for efficient, high-quality, and cost-effective monitoring.

FEATURES

- **24/7 Continuous Recording:** Automatically stores up to 10 TB of footage from connected cameras to secure your data for quick, convenient access
- **8-Channel Real-Time Live View:** Sharp image definition up to 5MP and an 8 channel display ensures you capture every detail, from every angle
- **Simultaneous Playback:** Replay the feed from up to 4 cameras at the same time, increase replay speed, and find events in the video schedule to easily review footage
- **Remote Monitoring:** Dedicated VIGI app is developed for remote monitoring, providing ease and convenience
- **H.265+:** Without using any extra bandwidth, your camera transmits compressed crystal-clear video to save disk space, ease network loads, and reduce monitoring costs without sacrificing image quality
- **ONVIF Ensure Compatibility**:** Easily add IPCs from VIGI and other brands to establish a powerful and varied network thanks to barrier-free compatibility
- **1 HDD Interface (up to 10 TB)^Δ:** Stores up to 10 TB (720 days* of video) on a SATA hard drive, keeping your data storage secured locally
- **Two-Way Audio:** With voice intercom support, carry two-way conversations while watching your feed from anywhere. Suitable for management
- **80 Mbps Video Access Bandwidth:** High video access bandwidth ensures your NVR connects more cameras with high resolution. Based on laboratory testing using VIGI cameras, VIGI NVR can connect up to eight 4MP cameras

^ΔA hard disk drive (not included) must be installed for operation.

**VIGI NVR works best with VIGI cameras but is compatible with other brands.

WARRANTY

3-years limited warranty
