TP-Link | TL-POE10E | Fast Ethernet PoE+ Extender

Supercharge your network infrastructure with the TP-Link TL-POE10E Fast Ethernet PoE+ Extender, designed to extend your PoE/PoE+ network connections up to an additional 100m – 250m (10 Mbps Mode). This extender provides unparalleled flexibility, allowing you to expand your network range without compromising on speed or efficiency. Whether you're powering IP cameras, access points, or other PoE-enabled devices, the TL-POE10E ensures reliable power and data transmission over extended distances.

With compliance to 802.3af/at devices and support for a maximum output power of 20W, the TL-POE10E is equipped to handle a variety of power-hungry devices. Its two 10/100Mbps ports guarantee faster transmission speeds, enhancing the overall performance of your network. The extender's Plug-and-Play functionality ensures a hassle-free installation process, requiring no complex configurations. Simply connect your devices, and the TL-POE10E takes care of the rest, making it an ideal solution for both beginners and experienced network administrators.

Say goodbye to the limitations of traditional network setups and embrace the convenience and efficiency of the TP-Link TL-POE10E Fast Ethernet PoE+ Extender. Extend your network reach seamlessly, power your devices reliably, and experience faster data transmission – all in one compact and user-friendly device. Upgrade your network capabilities with TP-Link's cutting-edge technology, ensuring a future-proof and efficient networking solution.

FEATURES

- Extends a PoE/PoE+ network connection an additional 100m – 250m (10 Mbps Mode) from the PoE power source equipment
- Compliance with 802.3af/at devices and supports the maximum output power of 20W
- 2 * 10/100Mbps Ports ensure faster transmission
- Plug-and-Play, requires no configuration

WARRANTY

3-years limited warranty
