

RG6 Quad BNC Crimp Connector | Integrated Pin

Product Images

Description

RG6 Quad BNC Crimp Connector | Integrated Pin

The BNC connector uses a solder centre pin for the coaxial cable centre conductor and a crimp ferrule for the outer braid and jacket. It is suited for RG6 coaxial cable, both leading vendor equipment manufacturers as well as OEM brands. A wide range of 19" server rack accessories are available from 4Cabling to compliment this cabinet as well as the rest of our range of quality server racks.
