Description

Global 7 Core Security Cable 14/0.20 Shielded 250m | Grey

The Global 7 Core security cable is the ultimate solution for all your security installation needs. Designed with precision and quality in mind, this cable ensures reliable performance and ease of use. The countdown metre marking allows installers to easily track the remaining cable length, enhancing efficiency and reducing waste. Batch numbering ensures quality control, providing peace of mind that each cable meets stringent standards. The pull box with a protective reel and stand simplifies delivery and handling, making installation straightforward and hassle-free.

This 7-core security cable features annealed copper conductors, providing excellent conductivity and durability. The PVC insulation and jacket offer robust protection against environmental factors, ensuring long-lasting performance. The cable is shielded, providing additional protection against electromagnetic interference, making it ideal for security installations.

FEATURES

- Count-down metre marking for easy length identification
- Batch numbered for quality control
