Description

2m IEC C13 to C14 Extension Cable M-F | Black

Looking for a reliable and efficient way to power your computer servers and equipment? Look no further than our 2m IEC C13 to C14 Extension Cord M-F! With male IEC C14 and female IEC C13 connectors, this cable is perfect for connecting your equipment directly to a high-density PDU with IEC C13 outlets, or simply as an extension to your power cord.

Our IEC extension power cords are designed for 10 Amp AC power and are commonly used in data centers to provide connections between PDU and UPS devices and equipment with a C14 input.

Whether you're looking to power your home or office equipment, our IEC C13 to C14 Extension Cord M-F is the perfect solution. With a sleek black design and a wide range of connector types and lengths available, we have everything you need to get your equipment up and running quickly and easily.
